Really nice little adventure game. Not a must play, but it's nicely animated with decent puzzles that are only occasionally obtuse. If you like the genre, it's worth a look.. --Alpha build 1.1.12--

Similar to Banished - But smoother, softer graphics. Less involved.

Similar to City Skylines/SimCity/Cities XL - But set in a medieval era and more simplistic.

What it offers: Build buildings by sections, simplistic production lines, spawn sheep for days, villager happiness/needs, simple quests, atmospheric music, relaxing ambient sounds, pleasingly simple graphics, aesthetic decorations/buildings, easy to learn.

What it doesn't *CURRENTLY* offer: In-depth trade/economy/military systems, polished graphics/gameplay, long hours of gameplay/replayability, hunting, fighting, proper tutorials.

If you're looking for a medieval citybuilder/town management game for your downtime - this is it. If you're looking for something that's super involved, in-depth and polished - then keep looking. For what's available in the game, I think it's worth playing for those who like the genre and just want a leisurely game. I was skeptical when I bought it, from looking at reviews, but it turned out to be just the kind of game I had hoped it to be! It's only in its very early stages and I already love playing it. It does feel a bit pricey and possibly it is for what's available. But the team are very transparent and honest about their work and what's happening with the game and are actively working on it around the clock - So if the price of a game isn't a huge issue, I recommend buying it as it'll see updates regularly.. Local co-op with one controller for each player, but there's only one HMD, so how would that work?

Anyway, I was alone at home so I played it by myself. One controller is the racket, the other controller some device that doesn't do anything at all? I could never get it to work in any of the different game modes.

At the beach, I couldn't start any of the games. In the other two locations it worked. I suspect this game is aimed at children, but the physics aren't so good (hitting a balloon doesn't feel real and sometimes the balloon goes through the racket). Balloons float down very slowly so there's no real excitement, maybe for 3-4 year olds? Balloons that fall on your head just pass through your body, which totally kills immersion. You play in a tiny, almost invisible glass cube and the balloons can't leave the cube, so you don't have to move at all. I have a 6-year old daughter but this is not going to be able to hold her attention for longer than 60 seconds max, and then probably never again. Too bad, I wish there were more quality VR games for children.. \u7d20\u6674\u3089\u3057\u3044\u30b9\u30c8\u30fc\u30ea\u30fc\u3067\u3059\u304c\u3001\u6b8b\u5ff5\u306a\u3053\u3068\u306b\u3001\u30b9\u30c8\u30fc\u30ea\u30fc\u306f\u975e\u5e38\u306b\u77ed\u3044\u3067\u3059\u3002 Addictive and challenging.. game is pretty good, adventure type clicker 9/11 will r8 gr8.

earthquake LOLLLLL HAHHAHHA!!!!!!!!!! I bought it at a discounted price ages ago. (maybe 10-15 euros)
Eitherway, does its job perfectly and it is bloody simple to use.
No fancy things, just the real basic stuff.

I capture everything with this and then edit with the (free) Resolve [DaVinci].
Makes a bloody cheap kit that works 100% for simple youtube stuff you might want to do, even if not for the general public, to show some friends.

It is well-known enough so that all other softwares recognise it... captures the sound on VoIP software... what can I say...
Very happy with it.

(Also runs w/out steam, it says it does so with fewer functionalities... never realised which).. Hello Friends! This is the season pass that gives you access to all the story DLC's for the game. I got this when it was on sale, and was pretty satisfied with the cheap price i bought it at. Considering there is only three dlc's it opens, it is probably better to buy the ultimate franchise pack when it is on sale.

Recommended for paying for it instead of buying all the story dlc's seperate, which would cost more.. The pack downloads just fine. Whatever the issue was , it has been fixed. Time to learn some new songs.. The updates were nice (when we got them) but we were sold this game in a promise for more features and all we got was a game that now get 0 updates (last one in dec 2016) and has broken dedicated servers. Thanks for taking the money though. You can play the game but you might as well just get the normal games and be done with it.. simple and minimalistic i like easy game lika that but then 6k this game realy hard. This expansion is designed for 2 or 3 players and it does work well with this smaller number of players. It is a very tunnel heavy map so they have introduced a new tunnel card instead of the wild card which can be used only for tunnels but you can still take a second card after taking one from the face up cards. I prefer the wild cards but the tunnel cards do work fine. The new connect countries cards mean you can connect all the countries and just keep drawing more cards and rack up loads of points. So it is not the best map but it is more suited to fewer players.
